

Kevin Vance
kevin.vance@example.com | +1-555-0182 | github.com/kevin-dev
Target Role: Senior Full Stack & Cloud Architect

SUMMARY

Experienced software engineer with deep expertise across cloud orchestration, microservices, front-end architecture, and machine learning.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Go
Frontend: React, Next.js, Redux, TailwindCSS
Backend & Cloud: Node.js, FastAPI, Docker, Kubernetes, AWS, Terraform, CI/CD, Microservices
Databases: PostgreSQL, MongoDB, Redis
Machine Learning: TensorFlow, PyTorch

PROFESSIONAL EXPERIENCE

Cloud & Backend Engineering Intern | Apex Cloud Systems
Duration: 8 Months (Jan 2025 - Aug 2025)
- Architected enterprise Kubernetes clusters and managed multi-region AWS deployments using Terraform.
- Built scalable event-driven microservices using FastAPI and Kafka, reducing latency by 45%.
- Containerized 20+ legacy backend microservices using Docker and automated CI/CD deployment pipelines.

PROJECTS

1. Distributed AI Microservices Platform
 - Implemented deep learning inference pipelines using TensorFlow and PyTorch.
 - Orchestrated 12 microservices with Docker Compose and Kubernetes.
2. Full-Stack E-Commerce Enterprise App
 - Developed high-performance React front-end application with state management.
 - Integrated Redis caching and PostgreSQL database layer.

CERTIFICATIONS

1. AWS Certified Solutions Architect - Associate
2. Certified Kubernetes Administrator (CKA)
3. HashiCorp Certified: Terraform Associate
4. Meta Front-End Developer Professional Certificate
